

Benchmark Inventory & Records Producer-Certification Worksheet

CROPLAND

To CSP Applicant: _____ (Applicant Name)

For those cropland acres you wish to enroll in CSP, please consider the following required minimum level of treatment.

The minimum level of treatment for soil quality on cropland is:

- Maintain positive soil conditioning index.

The soil conditioning index has three main components: 1) the amount of organic matter returned to or removed from the soil; 2) the effects of tillage and field operations on organic matter decomposition; and 3) the effect of predicted soil erosion associated with the management system.

To assist with determining if the cropland offered meets the minimum level of treatment requirement, please complete the following Cropping Management Inventory Worksheet.

Certification Statement

The information contained on the Cropping Management Inventory Worksheet is correct to the best of my knowledge. I understand that if requested, I can provide a minimum of two years of documentation to support the information provided on the Cropping Management Inventory Worksheet.
